

Serenity 900 Auto-Weighing Digital Alternating Pressure Mattress - Very High Risk

The Serenity 900 Auto Mattress is a state-of-the-art care solution specifically designed for residents at very high risk (grades 3-4) in care homes. This innovative mattress is equipped with advanced auto-sensing technology, diligently measuring the resident's weight every 12 hours. Embedded in a durable 7-inch cell-on-cell construction, it not only offers unparalleled support but also supreme comfort.

Uniquely adaptive, the Serenity 900 Auto seamlessly adjusts to each resident's weight, utilising real-time data to provide tailored pressure management. This not only personalises care for each resident but also significantly reduces the workload for nursing staff, streamlining the care process. Furthermore, its versatile therapeutic modes are specifically developed to meet a wide range of care needs, ensuring high-quality, continuous resident comfort and support.

STANDARD FEATURES

Design & Comfort: A state-of-the-art 30-cell design offering optimal pressure relief and consistent comfort, adapting to the resident's movements and needs.

Safety Assured: Includes a rapid CPR Function for emergency situations, ensuring quick and safe deflation.

Ease of Use: Equipped with a user-friendly digital pump for precise and effortless adjustment of mattress settings.

KEY FEATURES

Auto-Weigh Technology: Automatically measures the resident's weight every 12 hours and accurately adjusts the air pressure based on the real-time weight data, ensuring continuous and personalised support.

Innovative Comfort: Integrates a Pillow Function with three static head cells, specifically designed to provide stable support to the head and neck to enhance comfort.

Digital Excellence & Security: The digital pump boasts an LED weight setting display, offering caregivers the ability to fine-tune comfort settings with precision, ensuring optimal care tailored to each resident's needs.

Reliable Warranty: Backed by a comprehensive 2-year warranty, providing care home owners with assurance of durability and quality service.

Zone Cell Deflation: Equipped with quick release valves, allowing for single cell deflation. This innovative feature simplifies maintenance while ensuring the mattress provides consistent comfort, even during repair work.

SPECIFICATION

PUMP

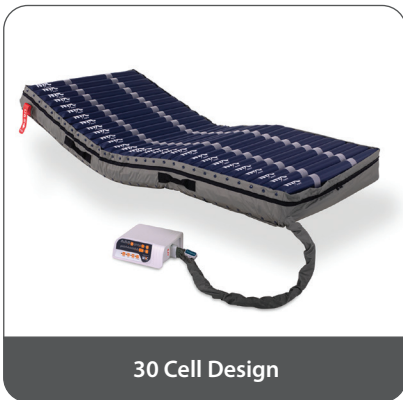

Air Output:	9 litres/min
Control Interface:	Digital
Pressure Range:	20-55mmHg, Adjustable
Cycle Time:	Adjustable (10/15/20/25 min)
Additional Features:	Including Alarms for Low Pressure, Power Failure and Various Modes

MATTRESS

Dimensions:	2030mm x 900mm x 200mm
Cells:	30 Air Cells, 7" Cell-on-Cell Design
Material:	Nylon/PU Cover, Nylon/TPU Cells
Max User Weight:	200 kg
Compliance:	BS 6807 Crib 5 / BS 7157 Crib 5 Standards
