

Floorline Profile Bed

NHC Group's Floorline Profile Bed is designed to cater to the diverse and complex needs of care home settings. This advanced bed, constructed from environmentally responsible materials, boasts a sturdy low-profile design and contemporary features like easy-to-use controls. With benefits such as reduced fall risk, enhanced independence, and adjustable comfort settings, it significantly elevates the living experience of residents. For care home managers and owners who prioritise resident safety, comfort, and overall satisfaction while maintaining operational efficiency, the Floorline Profile Bed emerges as the optimal choice for forward-thinking care environments.

STANDARD FEATURES

Design & Finish: A low-profile, robust design that melds functionality with aesthetic appeal.

Enhanced Safety: Exceptionally low minimum height significantly reduces fall risks and potential injuries.

User-Friendly: Simple assembly and disassembly processes, enhancing efficiency and convenience.

KEY FEATURES

Eco-Friendly Design: The Floorline Profile Bed embodies our commitment to the environment, constructed from sustainable materials for eco-friendly care homes.

Enhanced Safety: With its ability to lower almost to floor level, the bed significantly reduces the risk of injury from falls, prioritising resident safety.

User-Friendly Operation: Equipped with an intuitive control handset, it allows both caregivers and residents to adjust bed positions effortlessly, ensuring maximum comfort and safety. The handset also includes a lock function to maintain settings and prevent unintended adjustments.

Warranty: Our promise of quality comes with 10-year warranty on the frames, 5-year on the electrics and 1-year on the handheld control.

Positional Flexibility: With features like the Trendelenburg, Reverse Trendelenburg, Seating and Low positions, residents can easily find their ideal position for comfort or medical requirements.

Facilitating Care: Adjustable to various heights, the bed makes caregiving tasks more manageable, reducing strain on caregivers.
